SECURITIES NEWS

CAMBODIA : Financial IPOs to power Cambodia's stock market in 2019

Despite a 40% rise in the Cambodian Securities Exchange year-on-year, from 344.56 points for a market capitalisation of \$442.92 million (KHR1.77 trillion) against \$303.80 million in 2017, with a net profit margin average of 14.58 percent, the local bourse has been sluggish. Although it registered the sharp rise at the end of last year, the index is still down 37.38% (at the time of writing) from its April 19, 2012 high. It has been on an overdrive with active trading following the rise in trading accounts to 20,525 on Dec 31, 2018 from 8,973 at the start of 2018 with 84% owned by domestic investors. At a nascent stage and the smallest in the region, the market is a joint venture between the Ministry of Economic and Finance and Korean Exchange at a 55:45 ratio. Since its first listing, the index posted negative y-o-y growth as the pace of company listings averaged one per annum, only to make a shocking turn when it climbed 39.59% y-o-y on Dec 31, 2018. Net profit margin average came in at 14.58%. CSX features a Main Board to cater to large capital companies (\$350 million), Growth Board for small to mid-size firms such as start-ups and small and medium enterprises, corporate bond market, a collective investment scheme, and a derivative market for contract for difference. (Capital Cambodia)

BUSINESS & ECONOMIC NEWS

CAMBODIA : Acleda JCB debit card launched

The Acleda JCB debit card was launched on February 6 in Phnom Penh, the result of a partnership between Acleda Bank, the largest commercial bank in the Kingdom, and JCB International, a major credit card company based in Tokyo. Cardholders gain access to the more than 30 million merchants in JCB's network, in addition to discounts and special offers on dining and shopping in venues around the world. "ACLEDA Bank is delighted to be JCB International's strategic partner. JCB is a leader in payment services," said In Channy, president and group managing director of Acleda Bank, during the launching ceremony. (Khmer Times)

CAMBODIA : Exports to Japan up 27 percent in 2018

Trade with Japan increased significantly in 2018, with exports soaring 27.3% and imports growing by 17.8%, according to the latest figures from the Japan External Trade Organization (JETRO). From January to December last year, more than \$1.6 billion worth of shipments were sent to Japan, while Cambodia bought about \$421 million in Japanese goods. In December alone, exports to Japan rose by 19.9% compared to the same month last year, while imports grew by 19.2%. During that month, exports were valued at \$119.8 million, while imports were \$45.6 million. Most Cambodian exports were garments, footwear products and, to a lesser degree, electronic components such as mobile phone batteries. Japan mostly exported machinery, cars and electronics to the Kingdom, as well as beef, steel and pharmaceuticals, according to the Cambodian Ministry of Commerce. During a meeting last week with Cham Prasidh, the Cambodian Industry Minister, Fumio Yamada, director of the Japan Cambodia Interactive Association (JCIA), announced that a Japanese company is planning to build a pump factory in the Kingdom in the near future. *(Khmer Times)*

CAMBODIA : Exchange rate stable after National Bank introduces monetary policy

The National Bank of Cambodia (NBC) last year used less riel to buy US dollars thanks to more financial institutions using the central bank's new monetary policy instruments. As a result, the exchange rate was stabilised. The NBC annual report said that between January and December last year, the bank injected \$875 million worth of riel into the economy to stabilise the exchange rate. This amounted to a nine per cent decrease from 2017. As a result of the intervention, the exchange rate against the dollar remained stable at an average of 4,050 riel per US dollar. As Cambodia is a heavily dollarised economy, the NBC is limited to purchasing dollars and making changes to reserve requirements to stabilise the exchange rate. The NBC said many financial institutions, including microfinance institutions, are in need of more riel, which they are able to receive through the NBC's new monetary policy instrument, which holds liquidity-providing collateralised operations (LPCOs). *(Phnom Penh Post)*

INDONESIA : Indonesian economy posts 5.17% expansion last year

Indonesia posted slightly stronger economic growth in 2018, data showed on Wednesday, but it still fell well short of President Joko Widodo's 7% target as elections draw closer. Southeast Asia's biggest economy expanded 5.17% on-year, ticking up from 5.10% in 2017 and beating most analyst forecasts. Domestic spending was a key driver, the statistics agency said, as the commodities-driven economy weathered rocky global demand. "This growth is quite an accomplishment given uncertainty in the global economy and fluctuating commodity prices," said statistics agency head Suhariyanto, who goes by one name. However, Indonesia has reported a widening trade deficit in recent months while its manufacturing sector shrank in January, the first contraction in a year which underlined a slowdown in production. "This kind of growth is not sustainable because it is driven by consumption instead of production," said Enny Sri Hartati, executive director of Jakarta based Institute for Development of Economics and Finance. The latest data come a few months before Widodo seeks re-election with his economic record topping the agenda. *(Phnom Penh Post)*

PHILIPPINE : Philippine inflation slowed to 4.4%, food prices rise

Inflation rose 4.4% year-on-year in January, the slowest in 10 months, partly as the full impact of the second round of oil excise tax increase under the Tax Reform for Acceleration and Inclusion (Train) Act was not yet felt at the start of the year. The rate of increase in prices of basic commodities was the lowest since March last year's 4.3%, but still above the government's target range of 2 to 4%. The January rate was also higher than the 3.4% a year ago. As consumer prices ease, the government expects headline inflation to return within target after it averaged a 10-year high of 5.2% last year. National Statistician Lisa Grace S Bersales told a press conference that the following commodity groups posted slower price increases year-on-year food and non-alcoholic beverages; alcoholic beverages and tobacco; clothing and footwear; housing, water, electricity, gas and other fuels; health; as well as transport. "The slowdown of inflation in January 2019 was mainly driven by the deceleration in the annual increments of food and non-alcoholic beverages, alcoholic beverages and tobacco, and transport," Bersales explained. *(Phnom Penh Post)*
