BUSINESS & ECONOMIC NEWS

**CAMBODIA :** Japanese eye hospitality investment in Kampot

Japanese investors announced yesterday their intention to invest in a bungalow development covering four hectares of land in Kampot province. The delegation of Japanese businesspeople announced their plans during a meeting with Chea Tay, the governor of Kampot province. The project will be located in Traeuy Kaoh commune in Kampot district. The provincial governor supported the project, adding that he wants to see more projects in the hospitality sector to meet rising demand from tourists. Soy Sinol, director of Kampot’s tourism department, confirmed the investment plans but had no details to share. “All we know is that they have a clear intention to invest in the project, but they haven’t told us any details about the project itself, such as the groundbreaking date or the capital that will be invested,” he said. “It is possible that they just need more time to study the project and that when they finish they will reveal more. “We hope the project will serve to attract more tourists from Japan as we are now focusing on making Kampot more beautiful and green,” Mr Sinol added. (Khmer Times)

**CAMBODIA :** Electronic goods sales up 30 percent last year

Sales of electronic products in the Kingdom rose sharply last year, a reflection of the increasing purchasing power of Cambodia’s growing middle-class. According to the Singapore office of global research firm GfK, the value of sales of electronic products increased by 27.8 percent in 2018, reaching \$413 million. Mobile phones accounted for \$282 million of this figure, while sales of consumer electronics – a category that includes televisions, washing machines, air conditioners, and refrigerators – amounted to \$121 million. By comparison, electronics sales in 2017 were valued at \$323 million, with \$214 million worth of mobile phones sold and \$109 million of consumer electronics. Sok Piseth, CEO of Ggear, an authorised distributor for LG Electronics in Cambodia, said demand for electronic products will be strong as long as the economy continues to thrive. (Khmer Times)

**CAMBODIA : Loans of \$50M boost the rice sector last year**

year to sustain the paddy market for farmers, according to RDB CEO Kao Thach. Thach told The Post on Thursday that despite many provinces in the Kingdom facing drought, the demand for loans remains high. "Our loans have already been released to rice millers. Since we have better options compared to commercial banks, we need to look for more funds to meet the needs of the rice industry." "Even though some areas are faced with drought, demand for loans is still high. There are still other areas with the potential for rice production," he said. Kao Thach said RDB will request a further \$50 million from the Ministry of Economy and Finance to meet the industry's demand. The government's decision to disburse loans directly through RDB sidestepped the Cambodia Rice Federation – the industry body which has lobbied the government since March 2016 to provide emergency funds to its members. Cambodia Rice Federation vice-president Hun Lak said the amount was based on necessity as its current loan balance is insufficient for the rice industry to sustain itself. "We still need more financial support to boost the rice industry. Based on realistic figures, the loans provided by the government are merely equivalent to approximately 10 per cent of the rice industry," he said.

**VIETNAM : Vietnam among nine countries with strongest US dollar this year**

VIETNAM is listed among nine countries where the US dollar is strongest this year, according to a report from Smart Travel. According to the 2019 Backpacker Index of Smart Travel, a participant in the Amazon Services LLC Associates Program, Hanoi and Ho Chi Minh City are named as the top two most affordable cities to travel to this year while Hoi An also makes the top ten. "For less than \$20 per day, travellers to Vietnam can pay for budget accommodation [hostels], meals, some entertainment and public transportation. Mid-range accommodation also tends to be affordable," Smart Travel says. While the exchange rate is predicted to increase slightly in Vietnam this year, the Big Mac Index suggests the dollar will remain very strong in Vietnam this year. According to Smart Travel, choosing a destination can be a difficult decision when you're looking to maximise your travel budget. By choosing a destination with a favourable exchange rate and strong US dollar, you can make the most of every penny spent this year. Besides Vietnam, Smart Travel also suggests travellers looking to stretch the dollar this year should consider Latin America and parts of Africa and Asia. Projected prices for Latin America and Africa are expected to decrease by two per cent for air travel and about 1.4 per cent for hotel this year, according to the Global Travel Forecast. (Phnom Penh Post)

**INDIA : India's growth may decelerate further despite election spending**

Billions of dollars of pre-election spending by the Indian government and political parties in the next two months is unlikely to stop the nation's economy from slowing further, economists said. Asia's third-largest economy lost momentum in the final quarter of 2018, as the annual rate of growth slipped to 6.6 per cent, much lower than expected and the slowest pace in five quarters. But the worst may not be over. Prime Minister Narendra Modi, who will be seeking a second term in elections due to be held by May, in an interim budget last month introduced populist spending measures worth 1.8 trillion rupees (US\$25.37 billion) and modest tax cuts in the current fiscal year ending Mar 31 in an attempt to win the votes of farmers and the urban middle class. That is on top of additional spending at state government level. The political parties are also likely to spend nearly 500 billion rupees during the election campaign, according to estimates of CMS, a Delhi-based think tank. But weakening global growth, rising oil prices in recent weeks, slowing growth in government spending on infrastructure and delays in investment decisions because of uncertainty about who will form the next government could more than offset the extra election-related spending.
