SECURITIES NEWS

CAMBODIA : Taiwanese garment company posts surge in Kingdom profits

Taiwanese-owned garment manufacturer Grand Twins International (Cambodia) Plc (GTI) posted a 48.78% surge in revenue and a massive 118% in net profit last year, according to its report filed with the Cambodia Securities Exchange on Wednesday. Its total revenue reached more than \$120 million – a \$39 million increase compared to 2017 while net profit soared to \$1.44 million, a \$783,183 increase compared to the previous year. During the fourth quarter of last year, GTI received total revenue of over \$38.94 million a 117.97% rise while its net profits were up 113.98% from the same period in 2017 to \$264,587. GTI board chairman Yang Savsin said in a statement filed with the stock exchange that the increase was thanks to the company's further improvement of its production lines to meet customer needs. "We will strengthen our relationships with our customers, especially our main client, Adidas, with the goal of seeing an increase in orders for 2019," he said, adding that: "We will cooperate with other partners to earn extra revenue through re-sewing and packaging". (Phnom Penh Post)

CAMBODIA : SSEZ mulls listing on CSX

Chinese-owned Silhanoukville Special Economic Zone Co Ltd (SSEZ) is considering listing on Cambodia Securities Exchange (CSX) before heading to Hong Kong Stock Exchange for a second listing in order to raise funds for real estate development in the zone. A change of heart from just launching an initial public offering (IPO) in Hong Kong, SSEZ president Jack Chen says it is currently discussing with the Cambodian government and CSX. "Negotiations are ongoing now with CSX. The government says it will support our listing. We still have some concerns, hence our discussion," he tells Capital Cambodia in an interview. Established in 2008, SSEZ is a partnership between Jiangsu Taihu Cambodia International Economic Cooperation Investment Co Ltd, owned Wuxi-based Hodo Group Company Yuandong Co Ltd, and Cambodia International Investment Development Group Co Ltd at an 80:20 ratio. Its close proximity to the Sihanoukville Autonomous Port and International Airport makes it a viable industrial area

for investors, made sweeter by lower land price than Sihanoukville Economic Zone (SEZ) along the coast. (*Capital Cambodia*)

BUSINESS & ECONOMIC NEWS

CAMBODIA : Royal Group to move forward with energy project

The Royal Group of Cambodia and partners China Southern Power Grid and China Huaneng Group on Tuesday said they will continue work on a project to build high voltage transmission lines in the Kingdom. The project will contribute to the transmission network in the country's northeast and enable energy exchanges with Vietnam and Laos. A pre-feasibility study was started by the three companies in 2017 but has not concluded yet. Representatives of the company expressed their intention to move forward with the project during a meeting Monday with Ith Praing, secretary of state at the Ministry of Mines and Energy. Victor Jona, director general of the energy department, told Khmer Times that the companies are still working on the pre-feasibility study. "The project focuses on building transmission lines in the northeast that enable the country to bring in electricity from neighbouring countries when we have a shortage, or to export it when we have a surplus," he said. In 2017, China Southern Power Grid and the Royal Group of Cambodia signed a memorandum of understanding on Investment and Development of the National Power Grid of Cambodia. (*Khmer Times*)

CAMBODIA : Ministry to diversify agriculture output

The Ministry of Agriculture will focus on diversifying agricultural production across the country to meet rising demand for vegetables and fruits from locals and visitors. The goal of diversifying and expanding agricultural output was announced yesterday by Agriculture Minister Veng Sakhon during a meeting with Jiangfeng Zhang, director of the Asian Development Bank's environment, natural resources and agriculture division. Mr Sakhon stressed the need to focus on products other than rice, a crop that has been prioritised in the last few years. "Over the past three years we focused mainly on rice. But the increasing number of tourists and rising demand from locals require that we update our goals and focus on different products that also have a lot of potential like cassava, corn for animal feed, mango and cashew nuts. "Horticulture in particular can boost farmers' incomes and lift their livelihoods," he said. Mr Sakhon requested ADB's assistance to increase the value of local agricultural products, expand processing and packaging facilities, improve roads, and build more warehouses and dryers. Um Uon, president of the Sambo Prey Kub Cashew Nut Association (*Khmer Times*)

CAMBODIA : Transfer pricing takes the spotlight

A year and a half after the law was introduced, the General Department of Taxation called on all corporations to abide by the Transfer Pricing Law. Following the Transfer Pricing Law will facilitate the process of filing tax returns, Traing Lay, director of GDT's advanced pricing arrangement and transfer pricing bureau, said during a seminar on transfer pricing. Transfer pricing is described as the price at which divisions of a company transact with each other, whether it is the trade of supplies, labour, or any other commodity. Seminar aimed to introduce the key concepts behind transfer pricing. It addressed how transfer pricing has been implemented in Cambodia and what to expect in the future, identified key transfer pricing risks for businesses, and sought to help companies develop an action plan to ensure compliance. In Cambodia, the Transfer Pricing Law was introduced in 2017 to combat perceived abuses by companies that lead to loss in tax revenue for the country. (*Khmer Times*)

CAMBODIA : Ministry promotes sustainable development

The Ministry of Industry and Handicraft's National Productivity Centre of Cambodia (NPCC) launched a three-day national conference on Tuesday to promote awareness of sustainable development and competitive agribusiness in Cambodia. Challenges that still linger in the Kingdom's agricultural sector were discussed on the first day of the conference such as productivity limitation, a lack of agricultural input quality, a shortage of technical provisions, scarce supply chain development, as well as insufficient livestock and fisheries to meet market demand. NPCC director Heng Eang said during the conference that though the Kingdom's agricultural sector has achieved a paddy production surplus, which has contributed a 41.5% increase in jobs, challenges still remain and need to be solved. "One of the aims of the conference is to set up a mapping system to promote the agribusiness sector and focus on

technological innovations to train agriculturists on their farms, enterprises and companies to success in their field," he said. *(Phnom Penh Post)*

CAMBODIA : Japanese companies expand operations in Cambodia

Two of the largest Japanese firms with operations in the Kingdom are planning to build new facilities at Phnom Penh Special Economic Zone (PPSEZ). Nippon Express, a well-known logistics company, and Oji Group, a leading packaging firm, last month reached land leasing agreements with the authorities of the special economic zone. Nagaoka Susumu, senior manager for customer service at PPSEZ, told Khmer Times that Nippon Express, who built its first plant in the Kingdom in 2014, will be leasing four hectares of land at the SEZ to raise a warehouse. Oji, who built a factory in Preah Sihanouk province in 2012, will lease 6.2 hectares on which it will build a packaging materials factory, Mr Susumu said. "The new facilities will smooth out the production process for existing investors at PPSEZ. We hope these investments will help attract more manufacturers to the SEZ," he added. *(Khmer Times)*

CAMBODIA : Big rise in funds for travel goods manufacturing

Cambodia has seen investment in the manufacture of travel goods soar noticeably in early this year as the Council for the Development of Cambodia (CDC) figures reveal grants for bag manufacturers accounted for nearly half of all investment projects. Industry insiders claim the spike is due to tariff privileges Cambodian-made travelling goods receive from the US under its Generalised System of Preferences (GSP) and the increasing trend of global manufacturing firms leaving China due to rising labour costs. CDC has granted investment approval to a total of 45 projects from January to Tuesday, according to figures on its Facebook page, of which 21, almost half, were for bag manufacturing. The accumulated investment capital for the 21 projects is about \$100 million, and if all projects materialise, 31,951 jobs will be created. CDC reviews investment applications and grants incentives to investment projects meeting the requirements as laid out in Cambodian investment law. *(Phnom Penh Post)*

CHINA : China hopes to boost infrastructure construction

THE Chinese government's increased spending this year is expected to boost construction of infrastructure and ease financial risks, a priority measure the government will take to stabilise economic growth, according to analysts. China will raise its fiscal deficit target to 2.76 trillion yuan (\$411.8 billion), or 2.8 per cent of GDP, this year from 2.6 per cent last year, according to the annual Government Work Report released on Tuesday. The report was delivered by Premier Li Keqiang at the opening of the second session of the 13th National People's Congress on Tuesday. The policies listed in the report will be reviewed and discussed by legislators and policy advisers during the session. Total government spending is budgeted at more than 23 trillion yuan, up by 6.5 per cent from last year, the report said. As a major measure to tackle economic risks, the proactive fiscal policy this year will become stronger and more efficient, Li said. "That's a big decision made by the government," said Sun Ruibiao, deputy head of the State Administration of Taxation and a member of the 13th Chinese People's Political Consultative Conference National Committee. *(Phnom Penh Post)*

AUSTRALIA : Australia's economy slows ahead of election

AUSTRALIA'S economic growth ground to a near halt in the second half of last year, official data showed on Wednesday, thrusting the issue front and centre of an already contentious general election campaign. The economy grew at 2.3 per cent last year, Australia's statistics agency said, but slowed considerably in the second half of the year as consumer spending weakened and storm clouds gathered in the long-booming housing market. Growth for October to December stood at 0.2 per cent, after a 0.3 per cent reading in the previous three months. The data are a setback for conservative Prime Minister Scott Morrison, who has based his re-election campaign on his stewardship of the economy. On the hustings, he has repeatedly warned Australians that electing the centre-left Labor party in an expected May election would spell an end to 28 years of continuous growth. It was the increase in public spending of 1.8 per cent in the fourth quarter – as Morrison opened his chequebook for a slew of pre-election community programmes – that helped the economy avoid tipping into negative territory. Treasurer Josh Frydenberg tried to strike an optimistic note, telling reporters that the "economy and its fundamentals are strong". *(Phnom Penh Post)*
