SECURITIES NEWS

CAMBODIA : CSX launches app and website to teach public about securities investment

The Cambodia Securities Exchange (CSX) yesterday officially launched a website and an app to help investors and the public achieve a better understanding of the stock market. The website phsarhun.com and the app PhsarHun were introduced to the public during the 2018 My First Stock Exhibition, held in Phnom Penh. "The stock exchange website and app include essential information about listed companies, stock quotes and instant facts, electronic books, hot news and articles, as well as a chat room to discuss stock market related issues," said Hong Sokhour, CEO of CSX. He explained that the app is only available on Android phones at the moment, but that it will launch on iOS systems in the near future. Sou Socheat, director general of the Securities and Exchange Commission of Cambodia (SECC), said the new tools will help make information on the local bourse more easily available. (Khmer Times)

BUSINESS & ECONOMIC NEWS

CAMBODIA : Investment in extractive industry worth 1.3 billion

Foreign direct investment (FDI) in the extractive industry, including some projects expected to be approved before the end of the year, now equals \$1.3 billion, making it one of the most valuable economic sectors in the kingdom, according to data from the Ministry of Mines and Energy. "Investment projects that have been approved already or will be approved this year for mining and oil extraction amount to \$1.3 billion," said Minister of Mines and Energy Suy Sem speaking during a ministry meeting. "This investment will boost the sector, making it one of the biggest in the kingdom for 2018-2019." Yos Monirath, ministry spokesman, said most investment is going towards oil extraction, with only two big projects in mining, representing a comparably small investment. "We currently have two big mining projects one in Ratanakiri and another in Mondulakiri. In Ratanakiri we are now building the infrastructure, while the project in Mondulakiri

was recently submitted to the Council for the Development of Cambodia for approval". (*Khmer Times*)

CAMBODIA : RCEP agreement edges closer to conclusion

The Regional Comprehensive Economic Partnership (RCEP) is likely to be finalised in 2018, with participating countries committed to finish negotiations by the end of the year, according to a joint media statement released after the 4th RCEP Intersessional Ministerial Meeting. The meeting, held Saturday in Singapore, was attended by ministers and other high-ranking officials from Asean member countries as well as Australia, China, India, Japan, Korea and New Zealand. Lim Jock Hoi, Asean's secretary general, was also present in the negotiations. The RCEP is a proposed free trade agreement between Asean's ten member states and the six states with which the association has existing free trade agreements: Australia, China, India, Japan, South Korea and New Zealand. "Ministers instructed all negotiators to ensure that every negotiating round and intersessional meeting achieves concrete outcomes that will bring the negotiations closer to the finish line, and to promptly raise any issue requiring the ministers' guidance," the statement read. (*Khmer Times*)

CAMBODIA : Government denies rumours of national cryptocurrency

Government officials today shot down rumours that Cambodia would be issuing its own national cryptocurrency, despite international media coverage and a high-profile government official's plan to attend an event organized by the company responsible for the claims. A firm called Entapay issued a press release on March 2 announcing the Asean Blockchain Summit would be held at the Sokha Hotel in Phnom Penh tomorrow. The press release says that "following Venezuela's lead, other countries have been trying to issue legal digital tender, including Cambodia", and announces deputy prime minister Men Sam An as the event's keynote speaker. Hak Hout, a spokesman for Ms. Sam An's office, confirmed her attendance and said she was invited by Entapay. He said it was "normal" for the deputy prime minister to attend such an event as a representative of the government. (*Phnom Penh Post*)

CAMBODIA : Ministry envisions new SME federation

The Ministry of Industry and Handicraft is working on the creation of a government-backed federation of small and medium-sized enterprises (SMEs), a body that will act as a representative for all SMEs in the country and function as a bridge between them and the authorities. Um Sotha, spokesman for the ministry, said they are now drafting the sub-decree needed to establish the federation, which, he said, will provide a channel of communication between the authorities and the SME community to address issues relevant to small entrepreneurs. "We want to establish a body to represent the entire SME community in the country. "With an institution that covers all SMEs in the country, we will be able to create policy and initiatives that do not exclude anyone," Mr Sotha said, adding that one of the functions of the body will be able to collect and analyze information about the SME community to produce data that can be used to help the sector. According to the ministry spokesman, the sub-decree is now being drafted with input from the private sector and other ministries. (*Khmer Times*)

CAMBODIA : Chinese businessmen visit capital

More than 20 leading companies from China are exploring investment and business opportunities in various sectors in Cambodia. The Council for the Development of Cambodia (CDC) together with the United Nations Industrial Development Organization (Unido) organised the visit of a business delegation to Phnom Penh. The delegation is composed of more than 20 Chinese companies from various sectors, including the automotive industry, light manufacturing, biochemical production, textiles, rubber-based products and heavy industry. The business mission is taking place within the framework of the Programme for Country Partnership (PCP) of the Cambodian government and Unido to support Cambodia's strategy of industrial diversification and the development of special economic zones. Cheng Qingtao, vice president of the China Chamber of International Commerce (CCOIC), one of the organisers of the event, said China has become Cambodia's biggest trade partner, with both countries continuing to support each other to facilitate trade and investment. CHINA : China hopes for early RCEP

Vying to increase its participation in the global economy, China recently expressed a commitment to prioritise work in various international free trade agreements, including the Regional Comprehensive Economic Partnership (RCEP), in which Cambodia is involved. Addressing the first plenary session of the 2018 National People's Congress (NPC), which is now being held at the Great Hall of the People in Beijing, Chinese Premier Li Keqiang yesterday announced that China is ready to speed up talks and efforts to build the Free Trade Area of the Asia-Pacific (FTAAP), and the East Asia Economic Community. "China is ready to work closely with all relevant parties to advance multilateral trade negotiations and will work for the early conclusion of negotiations on the Regional Comprehensive Economic Partnership," he said. Premier Li said his country is committed to promoting economic globalisation and free trade. "China calls for trade disputes to be settled through discussion as equals, opposes trade protectionism and will resolutely safeguard its lawful rights". (*Khmer Times*)

FRANCE : Oil sector needs 2020 investment vision to meet demand

The oil industry needs to quickly step up investment to meet rising demand as the booming US shale sector will only be able to quench the global thirst for crude for the next two years, the International Energy Agency said Monday. "The United States is set to put its stamp on global oil markets for the next five years," said IEA chief Fatih Birol in a statement as the agency released an annual review of the oil market. However he noted that "the weak global investment picture remains a source of concern" as the industry faces not only growing demand but many oil fields running dry. "More investments will be needed to make up for declining oil fields the world needs to replace three million barrels per day of declines each year, the equivalent of the North Sea while also meeting robust demand growth," added Mr Birol. The IEA released its five-year estimates for the market that see oil demand increasing by 6.9 million barrels per day (mbd) by 2023 to 104.7 mbd, boosted by economic growth in Asia and a resurgent petrochemicals industry in the US.
