CAMBODIA: Cambodia, Malaysia's securities regulators ink MoU for regulation

The Securities and Exchange Regulator of Cambodia (SERC) and the Securities Commission Malaysia (SC) on Monday signed the Memorandum of Understanding (MoU) to facilitate greater regulatory, enforcement and supervisory cooperation between the two securities regulators, said a press release. Both countries will strengthen collaboration in areas of mutual regulatory interest as it covers cross-border enforcement assistance, regulation and supervision of capital market intermediaries, and the facilitation of licensing information in the light of growing globalization and cross-border activities of regulated entities and persons in Cambodia and Malaysia. The MoU was signed by SERC's Director General Sou Socheat and Dato' Seri Awang Adek Hussin, Chairman of SC in the presence of senior officials of the 1 securities regulators, and held a discussion as a first step to explore the MoU's objectives to facilitate the development of the respective capital markets. Areas such as investor protection, capacity building and product offerings and development were discussed during the meeting. In furthering some of these areas, the two regulators agreed that consultation with domestic market participants would enable stakeholders to gauge relevant demand and feasibility. "With the MoU signing, the cooperation between the 2 authorities is highly valued, signaling strong trusted relationships and sharing experiences in various areas, especially regulation and supervision. Both markets will gain from this cooperation as this will create long-term benefits for our people and country in this globalization for the financial market," Socheat said. SC Chairman Dato' Seri Awang Adek Hussin said as connectivity among the markets in the member states of the Association of Southeast Asian Nations (ASEAN) has grown, it is imperative that bilateral regulatory cooperation between authorities needs to be increased and enhanced accordingly to develop and regulate their respective capital markets. Dato' Seri Awang Adek Hussin also said that the MoU addresses capacity building and human capital development as well as the exchange of regulatory expertise and technical knowledge

to facilitate and encourage the development of the respective capital markets, in tandem with the continued growth and development of both Cambodian and Malaysian capital markets. SERC is a statutory body established with a mandate to regulate the securities industry in Cambodia, while SC is the sole regulatory agency for the regulation and development of capital markets in Malaysia and has direct responsibility for supervising and monitoring activities of market institutions including the exchanges and clearing houses, and regulating all licensed persons. *(Khmer Times)*

CAMBODIA: Cambodia to be main cashew exporter'

Prime Minister Hun Sen said Cambodia could become one of the main cashew nut producers and exporters in the world, and added the commodity has the potential but limitations of processing. Cambodia exports about one million tons of unprocessed cashew nuts, the Prime Minister said at a graduation ceremony of the National Technical Training Institute of Cambodia on Monday. With the limitation of processing activities locally, the Premier called upon the private sector and investors to invest in the processing facilities to produce finished cashew products. "Cambodia will become one of the main cashew nut contributors in the future because now it exports about 1 million tons of unprocessed cashew nuts," the Prime Minister said. The government has enacted the National Policy on Cashew Nuts for 2022-27, which aims to increase production and value-added, giving hope to cashew farmers. It aimed to increase output with competitive quality, promote industrialization and increase processing to at least 25 % by 2027 and 50 % by 2032. The government aims to promote exports through market diversification, cross-sectoral linkages, trade facilitation, cost reduction and market superiority. The government also called upon the private sector and investors to consider investing in the processing industry in Cambodia as the country is rich in the raw materials of agriculture, he said. "Cambodia has raw materials, but processing is not enough. So Cambodia wants to attract investors to process locally available raw materials, and that in turn will create jobs and create added value for products," he said. Vietnam is the biggest market for Cambodia's raw cashew, a small share is export to India, and the rest goes to domestic use. The main markets for processed cashew products are Europe and Japan. In Lay Huot, chairperson at Chey Sambo Cashew Nut Processing Handicraft in Kampong Thom province said the commodity has potential that is in need of investment in facilities for processing, packaging, and production of finished products. "The investment on processing locally will contribute to providing value-added to cashew nut products but also create jobs and markets for farmers via contract farming," Lay Hout. A Cambodian Cashew Association report showed that in 2022, Cambodia exported \$1 billion worth of fresh cashew nuts. The largest importer of fresh cashew from Cambodia is Vietnam. In 2019, Cambodia exported 600,000 tons of fresh cashew nuts, 950,000 tons in 2020, and 1.1 million tons in 2021. Currently, more than 500,000 hectares of land are under cashew cultivation in 10 provinces. According to a Cashew nut Association of Cambodia report, Kampong Thom province has the largest cashew plantation of 90,959 hectares, followed by Kratie province with 47,858 hectares. *(Khmer Times)*

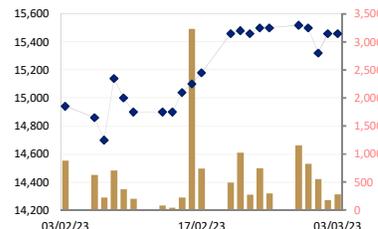

CAMBODIA: Cambodia's manufacturing output hit \$15.8 billion in 2022

Cambodia's manufacturing output hit \$15.8 billion in 2022; a remarkable increase of 83 % year on year, thanks to both domestic and international market demands after the Covid-19 pandemic waned worldwide. A report by the Ministry of Industry, Science, Technology and Innovation yesterday showed that 186 new factories were opened last year, a growth of 5 %, bringing the total number of active factories to 1,982. The registered manufacturing factories had a total investment value of \$16.6 billion as of last year, up 21 % compared to a year before, the ministry said. The sector has created some one million jobs in the country, 75 % of whom are women. As many as 83 factories shut down last year, the report read. Cham Prasidh, Minister of Industry, Science, Technology and Innovation, said that the manufacturing output rose by 83 % to \$15.8 billion last year. Products worth \$11.4 billion exported while \$4.35 billion sold on the domestic market, he said. "The industrial sector remained stable last year after facing the effects of Covid-19 in the previous years that led to disruption of factory operations and reduction of export orders," Prasidh said at an annual meeting to review the ministry's works in 2022. The meeting also set objectives for 2023. Prasidh attributed the rise in industrial output to the government's successful policy to counter the Covid-19 pandemic. The quick resumption of socio-economic activities was the main reason for the revival of the manufacturing sector. "The increased use of information and digital technology, the expansion of export markets, and the development of the financial sector were the positive factors in the transformation of Cambodia into an important and potential production, business and investment location providing confidence to both local and foreign investors," he said. The ministry said the manufacturing sector estimated to have contributed about 40 % to the country's Gross Domestic Product (GDP) in 2022. Garment, footwear and travel goods industry is the largest foreign exchange earner for Cambodia last year. Exports of Cambodia's

non-garment manufacturing products, including electronic components, bicycles, auto parts, furniture, leather, plastic and other industrial products also rose last year. In late 2021, Cambodia introduced a new investment law to increase the country's competitiveness for foreign investors by modernizing local industries and protecting the rights of investors. Lim Heng, Vice President of the Cambodia Chamber of Commerce, said the Regional Comprehensive Economic Partnership (RCEP), Cambodia-China Free Trade Agreement (CCFTA), as well as the country's new investment law, were all key to attracting new investors. "The opening of new factories clearly showed that Cambodia is a potential destination for both domestic and foreign investors. (*Khmer Times*)
